# Verimation Technology, Inc. Inherits the Legacy of K. J. Law Engineers

In 2002 **Verimation Technology, Inc.** acquired all of K. J Law's technology and inventory, and continues the K. J. Law tradition of high quality products and dependable service with all key former K. J. Law staff.

Verimation's experienced and talented engineers maintain a robust and time proven catalog of products covering a wide range of inspection solutions. With over four decades of success inherited, Verimation continues to demonstrate the ability to deliver high quality products and services that meet or exceed customer needs.

## **GAGING SYSTEMS:**

### **VERIMET® U1000 Universal Instrument**

In 2004, we began shipping systems utilizing Verimation's advanced VERIMET U1000 system to key customers. Verimet® represents the future of inspection instrumentation for Verimation. Built with modular software and hardware components, the VERIMET U1000 can handle the most challenging dynamic and / or static gaging applications with a single instrument built on standard Microsoft and industry-standard technology.

**Standard Features:** Temp Comp, Tool Comp, GR&R Mode, Bias Mode, Unlimited and Flexible Data Storage, Up to 64 LVDT's and Unlimited Test Formulas, Configurable Screens and .....TOTALLY USER FRIENDLY

## **TODAY & TOMORROW:**

Verimation Technology, Inc. continues to look to the future with a healthy percent of capital directed to advance planning and long range product development. Along the way the company is developing stronger partnerships and associations with tier one and two automotive parts suppliers, production line machine integrators, machine builders, fixture manufacturers, as well as in-process instrument systems for process monitoring and control. We feel the reputation we have established in our marketplace has gained the respect of our customers and competitors alike. We intend to maintain the high quality, reliability and good service attitude and capability that have always been provided to our customers.

## **GAGING APPLICATIONS:**
